# Antibiotic treatment for Pneumonia

## Causes for higher percentage is due to:

- Other cases (i.e. ear infection, fever... ) are also reported in pneumonia treatment section
- Less priority in palika level monthly meeting to discuss on data verification

## Next step:

- Use of revised HMIS tools will resolve this issue
- Regular data verification and review
- Regular monitoring and prompt feedback on data error

# New Initiatives

- Restructuring of District Ayurved Center as Ayurved and vaikalpik Chikitsalaya
- Digital Family health folder program in 24 local level
- PEP++ program effectively implemented
- E-LMIS expansion in health facilities (about 200 HFs)

# Lessons learned

- Mainstream of Private health facilities in DHIS-2 reporting platform would support to understand actual service coverage
- Ranking and appreciation to local levels would make healthy competition and encourage to improve health indicators
- Regular meeting in province level (such as health and nutrition cluster, supply chain management working group, RHCC etc...) would support for better coordination with stakeholders
- Provincial Program implementation guideline supported on effective execution of activities

## Priorities for next AWPB

- मुख्यमन्त्री घरदैलो स्वास्थ्य सेवा कार्यक्रम in 359 wards of 59 rural municipalities of Madhesh province (for mobilization of HA and Staff Nurse)
- Functionalize Health and wellbeing center at ward level
- Lab establishment in all local level of Madhesh Province
- Lab establishment in provincial Ayurved and vaikalpik Chikitsalaya
- Malnutrition free province declaration program

## Priorities for next AWPB...

- Establish 100 bedded Ayurved and vaikalpik Chikitsalaya
- Homeopathic doctor mobilization in Ayurved and vaikalpik Chikitsalaya
- High capacity Blood Bank Establishment under PPHL
- Preparation of Health Service Regulation
